Intervention

Outcome measures

Primary outcome

Patient satisfaction regarding the centralization of cancer care in South Limburg is the primary outcome measure in this study.

Secondary outcome

The secondary outcome measure in this study is the variation in patient satisfaction between the patients in the different hospitals.

Eligibility criteria

Inclusion criteria

- Patients who are referred from another hospital, then the hospital where they were treated for their oncological disease.

- Patients who are physically and mentally able and willing to answer the questionnaires.

Exclusion criteria

Patients who had already been under treatment in the centralized hospital and therefore were not referred.
