## Summary

### ID

NL-OMON23050

### Source

Nationaal Trial Register

### Brief title

RS

### Health condition

Cardiovascular, endocrine, hepatic, neurological, ophthalmic, psychiatric, dermatological, otolaryngological, locomotor, and respiratory diseases

## Sponsors and support

**Primary sponsor:** Erasmus University Medical Center, Rotterdam, The Netherlands

**Source(s) of monetary or material Support:** The Rotterdam Study is supported by the Erasmus MC University Medical Center and Erasmus University Rotterdam; The Netherlands Organisation for Scientific Research (NWO); The Netherlands Organisation for Health Research and Development (ZonMw); the Research Institute for Diseases in the Elderly (RIDE); The Netherlands Genomics Initiative (NGI); the Ministry of Education, Culture and Science; the Ministry of Health, Welfare and Sports; the European Commission (DG XII); and the Municipality of Rotterdam.

## Intervention

## Outcome measures

### Primary outcome

Clinical and subclinical outcomes in the cardiovascular, endocrine, hepatic, neurological, ophthalmic, psychiatric, dermatological, otolaryngological, locomotor, and respiratory research domain

### Secondary outcome

NA

## Study description

### Background summary

The Rotterdam Study is a prospective cohort study ongoing since 1990 in the city of Rotterdam in The Netherlands. The study targets cardiovascular, endocrine, hepatic, neurological, ophthalmic, psychiatric, dermatological, otolaryngological, locomotor, and respiratory diseases. As of 2008, 14,926 subjects aged 45 years or over comprise the Rotterdam Study cohort. Since 2016, the cohort is being expanded by persons aged 40 years and over.

### Study objective

The Rotterdam Study studies causes of diseases in the elderly, as a response to demographic changes leading to an increase of the proportion of elderly people in most populations.

### Study design

Baseline visit at the research centre, consecutive follow-up visits at the research centre every four years

### Intervention

None, observational cohort study

## Eligibility criteria

### Inclusion criteria

Members of the public, aged 40 years and over, living in the Ommoord district in the city of Rotterdam, The Netherlands

### Exclusion criteria

None

## Study design

### Design

Study type: Observational non invasive

Intervention model: Other

**Control:** N/A , unknown

## Recruitment

NL  
Recruitment status: Recruiting  
Start date (anticipated): 01-07-1989  
Enrollment: 19000  
Type: Anticipated

## Ethics review

Positive opinion  
Date: 13-11-2017  
Application type: First submission

## Study registrations

### Followed up by the following (possibly more current) registration

No registrations found.

### Other (possibly less up-to-date) registrations in this register

No registrations found.
