

# An explorative and feasibility study of Venetoclax combined with Tamoxifen in patients with relapsed/refractory Diffuse Large B-cell Lymphoma

Gepubliceerd: 25-11-2020 Laatste bijgewerkt: 13-12-2022

TAM and ven can be used with acceptable safety and there will be a measurable overall response. Study is exploratory, so no numbers are given yet.

## Samenvatting

### ID

NL-OMON20687

### Bron

Nationaal Trial Register

### Verkorte titel

TamVen

### Aandoening

Patients with relapsed/refractory DLBCL younger than 70 years after at least 2 lines of conventional chemotherapy. Patients with relapsed/refractory DLBCL older than 70 years after at least 1 line of conventional chemotherapy.

## Ondersteuning

**Primaire sponsor:** UMCG

**Overige ondersteuning:** UMCG Hematology

## Onderzoeksproduct en/of interventie

## Uitkomstmaten

### Primaire uitkomstmaten

Descriptive analyses of safety and toxicity (using SAE grade 3 and 4 listing) of tamoxifen and venetoclax

## Toelichting onderzoek

### Achtergrond van het onderzoek

Patients with relapsed/refractory DLBCL in this study are treated with oral Venetoclax (Ven; 800 mg once daily) and oral Tamoxifen (Tam; starting with a ramp-up phase; 2 days 10mg, 2 days 20mg, and 40mg once daily). These doses are the approved doses for treatment of breast cancer (Tam) and the advised dose for the treatment of B-cell Non-Hodgkin Lymphoma (NHL). The main objectives are to assess safety and efficacy of Tam and Ven.

### Doel van het onderzoek

TAM and ven can be used with acceptable safety and there will be a measurable overall response. Study is exploratory, so no numbers are given yet.

### Onderzoeksopzet

at entry, prior to start Venetoclax, 24h, 72h, 7 days, 28 days and 90 days after start Venetoclax

### Onderzoeksproduct en/of interventie

Patients in this study are treated with oral Ven (800 mg once daily) and oral Tam (starting with a ramp-up phase; 2 days 10mg, 2 days 20mg, and 40mg once daily). These doses are the approved doses for treatment of breast cancer (Tam) and the advised dose for the treatment of B-cell Non-Hodgkin Lymphoma (NHL)

## Deelname eisen

### Belangrijkste voorwaarden om deel te mogen nemen (Inclusiecriteria)

- Patients of 18 years and older and under the age of 70 with a diagnosis of Diffuse Large B-cell lymphoma (DLBCL) and High-grade B-cell lymphoma (HGBCL) (according WHO 2016) and refractory after 2 lines of therapy. Patients with relapsed/refractory DLBCL/HGBCL older than 70 years after at least 1 line of conventional chemotherapy.
- Written informed consent.
- No known allergy to Ven or Tam.

### Belangrijkste redenen om niet deel te kunnen nemen (Exclusiecriteria)

- Eastern Cooperative Oncology Group (ECOG) performance status >2
- Absolute neutrophil count (ANC) <1,000/ $\mu$ L
- Platelet count <50,000/ $\mu$ L
- Absolute lymphocyte count <100/ $\mu$ L
- Primary and secondary CNS lymphoma
- Active systemic fungal, viral or bacterial infection
- CrCl <30 mL/min calculated according to the modified formula of Cockcroft and Gault or by direct urine collection
- Pregnant or breast-feeding woman

## Onderzoeksopzet

### Opzet

Type: Interventie onderzoek

|                  |                         |
|------------------|-------------------------|
