Uitkomstmaten

Primaire uitkomstmaten

satisfaction of the breast after breast conserving therapy with reconstruction

Toelichting onderzoek

Achtergrond van het onderzoek

We will use the Breast-Q questionnaire to investigate the patients' satisfaction concerning her breast after oncoplastic breastreconstruction. We will compare this outcome with the satisfaction of patients that receive a breast conserving surgery without reconstruction.

Doel van het onderzoek

Patients that receive breast conerserving therapy due to breastcancer with an oncoplastic reconstruction by the plastic surgery are more satisfied with their breast compared to patients receiving breast conserving therapy without a reconstruction.

Onderzoeksopzet

preoperative

postoperative, before the adjuvant radiotherapy

postoperative, 3 months after the adjuvant radiotherapy

postoperative, 12 months after the adjuvant radiotherapy

Onderzoeksproduct en/of interventie

- Patients that receive breast conserserving therapy due to breastcancer with an oncoplastic reconstruction by the plastic surgery
- Patients that receive breast conserving therapy due to breast cancer without a reconstruction.

Deelname eisen

Belangrijkste voorwaarden om deel te mogen nemen (Inclusiecriteria)

- female
- Age of at least 18 years
- Patient will undergo a curative breast-conserving surgery due to breast cancer in the affected breast
- Mastery of the Dutch language in word and writing.
- Informed consent for participation in the research

Belangrijkste redenen om niet deel te kunnen nemen (Exclusiecriteria)

- Intellectual limitation to such an extent that it can be expected that the interpretation and / or completion of the questionnaires is a problem.
- Previous radiotherapy on the affected chest

Onderzoeksopzet

Opzet

Type:	Observationeel onderzoek, zonder invasieve metingen
Onderzoeksmodel:	Parallel
Toewijzing:	Niet-gerandomiseerd
Blinding:	Open / niet geblindeerd
Controle:	Actieve controle groep

Deelname

Nederland
